

Technical Support / MoU Conversation Template

Parties: AXIOM project team and [organisation]

Purpose: explore a technical support path for a funded Phase-1 aviation operations substrate.

AXIOM's Phase-1 path includes FF-ICE/FIXM/AIXM/SWIM interoperability, maintenance evidence chains, audit replay, signed rule packs, and regulator-readable operational evidence.

REVIEW AREAS

- trajectory / flight-object assumptions
- maintenance and technical-state evidence model
- audit/replay and regulator-pack expectations
- security, signing, secrets, DR, and operational resilience gates

NON-BINDING SCOPE

This document is a discussion template, not a production commitment. The useful contribution is review access and constraints discovery before production software is built.
